DC/AC Air Conditioners

12/24/48V Marine Generator

- 12V - 240amps
- 24V - 130amps
- 48V - 65amps
- Weight - 120kgs
- Dimensions with sound shield:
L849mm x W536mm x H566mm

The DC generator system is designed and optimised to deliver high currents at low voltages required for battery charging and operating DC loads. No battery chargers or power supplies are required.

DC generators do not require a transfer switch. Transfer switches lower system reliability.

In prime power applications the DC generator lower the overall cost of the system.

DC generators are more fuel efficient.

Advantages:

- ✓ Volvo D1-13 reliability
- ✓ Quiet running
- ✓ Auto Stop/Start on demand
- ✓ High output alternator
- ✓ Simplistic design
- ✓ Low voltage - safe operation
